PROFESSIONAL SUMMARY

Flutter Developer with hands-on, commercial experience delivering production mobile apps across location-based services, insurance, government, and e-commerce domains. Strong grounding in Dart, OOP, SOLID principles, and design patterns, with practical experience in BLoC/Cubit and Provider state management, REST API integration, Firebase, and Git workflows. Comfortable with cross-functional, international teams, and quick to adopt AI-assisted tools (GitHub Copilot, Cursor, Claude Code).

SKILLS

Languages & Frameworks: Dart, Flutter (iOS, Android, Web), Basic JavaScript

Architecture & Design Patterns: OOP, SOLID Principles, Clean Architecture, MVVM, MVC, Design Patterns

State Management: BLoC, Cubit, Provider

Mobile Development: Responsive UI, Adaptive Layouts, RTL/Arabic-first UI, Cross-Platform Development, Performance Optimization, Google Play & App Store Publishing

APIs & Integrations: RESTful APIs, JSON Handling, Third-Party APIs, Google Maps API, Payment Gateway Integration, OpenAI API, Real-time Communication (SignalR, Socket.IO), Agora SDK

Backend & Cloud Services: Firebase (Authentication, Firestore, Cloud Functions), Supabase, Push Notifications

Testing & Quality: Debugging, Regression Testing, Bug Investigation, Root Cause Analysis, Code Reviews

Tools & Workflow: Git, GitHub, Version Control, Pull Requests, Jira, Agile/Scrum, CI/CD basics

AI-Assisted Development: GitHub Copilot, Cursor, Claude Code

Core Computer Science: Data Structures, Algorithms, Problem Solving

WORK HISTORY

Mobile App Developer (Flutter), 01/2026 - Current

Freelance – Remote

- Designed and delivered 3+ ***custom Flutter mobile applications*** for independent clients, implementing responsive UI/UX, BLOC/Cubit & Provider state management, and integrating RESTful and third-party APIs, achieving ***95% client satisfaction***.
- Managed the ***full app development lifecycle*** from requirements gathering to deployment on Google Play and App Store, delivering projects on time and within scope, while reducing development time by ***20%*** through reusable components.

Mid-Level Mobile App Developer (Flutter), 07/2025 - 07/2026

Akhdar – Maadi Cornish, Egypt

- Developed and maintained the Akhdar mobile app using Flutter/Dart, applying ***MVC/MVVM architecture and SOLID principles***, improving code scalability and reducing bugs by ***25%***.
- Integrated ***Firebase services*** (Firestore, Authentication, Cloud Functions) and RESTful APIs, enabling real-time features and improving data sync performance by ***30%***.
- Built and optimized ***RTL Arabic-first UI***, enhancing accessibility and increasing user engagement by ***20%*** across Arabic-speaking users.
- Leveraged ***AI-assisted development tools*** (GitHub Copilot, Cursor, Claude) to accelerate development and debugging, reducing feature delivery time by ***35%***.

Junior Mobile App Developer (Flutter), 10/2023 - 07/2025

GrandTechnology – El-Sheikh Zayed City, Egypt

- Contributed to Flutter app development across ***multiple projects***, implementing reusable UI components and API integrations, increasing development efficiency by ***25%***.
- Worked closely with product and engineering teams to deliver scalable mobile features, improving user experience and reducing post-release issues by ***15%***.

Mobile App Developer (Flutter) — Internship, 09/2022 - 12/2022

SteamTroops – Remote

- Built and delivered ***1 Flutter app features*** using data structures, object-oriented programming, and design patterns within a remote, cross-cultural team, improving feature performance and reducing bugs by ***20%***.

EDUCATION

Bachelor of Science: Computer Science, 2019-2023

Mansoura University – Al Mansurah, Egypt

- Graduation Project: Animocare (Flutter) — Grade A+.
- GPA: Very Good (3.447 / 4.0)

PROJECTS

RealEstate (Flutter · OpenAI API · Supabase) — End-to-end real estate app with a text/voice conversational AI assistant grounded in live listing data.

Masar (Flutter · Firebase · Google Maps · Saudi Arabia) — Smart commute assistant with geofencing-based trip tracking, real-time stats, and full RTL support.

FindsApp (Flutter · App Store & Google Play) — Discovery platform helping users find and explore new favorite spots.

- View on App Store

ECIP (Flutter · Google Play · Egypt) — App for checking compulsory vehicle insurance status and motor insurance services in Egypt.

- View on Google Play

Akhdar (Flutter · App Store & Google Play) — Book-summary app helping readers quickly absorb key ideas from popular titles.

- View on App Store
- View on Google Play

Gamerleague (Web Platform) — Platform where users form teams and compete in gaming competitions.

- Visit gamerleague.live

Brainiacs (Flutter · Mobile Game) — Brain-training game with strategy, reflex, memory, and knowledge challenges.

HealthCorner (Flutter · E-Commerce) — App for browsing health products and completing secure in-app payments.

Buy2 (Web · App Store & Google Play) — Cross-platform HR and task management system for organizational workflows.

ELibrary (Flutter Web App) — eBook platform letting users save books and track reading progress.

TARASUL (Ministry of Finance, State of Kuwait) — Digital correspondence and document management app for internal ministry communication.

Animocare (graduation project) — Developed a Flutter-based pet care application featuring AI-powered cat sound emotion prediction, nearby animal shelter discovery using Google Maps, and a marketplace for pet products.

COURSES

iCareer Technical Training (Issued Sep 2026 · Expired Oct 2026)

- Hands-on training in BRD/PRD, Requirements Analysis, User Stories, Scope Definition, Acceptance Criteria, Jira, Sprint Planning, and Backlog Management.
- Applied Cursor, Claude Code, MCP workflows, AI-assisted coding, debugging, and testing.
- Practiced Git/GitHub, Pull Requests, Code Reviews, Root Cause Analysis, Bug Investigation, Verification, and Regression Testing.
- Completed a team-based end-to-end technical capstone involving requirements, documentation, testing, and project presentation.
- Covered ATS CV optimization, LinkedIn, job search strategies, STAR interview preparation, and professional communication.
  - Show License

Google Developer Student Clubs in University of Khartoum — GDG on Campus - University of Khartoum (Issued Apr 2022 · Expired May 2022)

- Show License

Flutter Workshop — Orange Digital Center Egypt (Issued 10/Sep 2022 · Expired 15/Sep 2022)

- Show License

Flutter Summer Training Program — Information Technology Institute (ITI) (Issued Jul 2022 · Expired Sep 2022)

- Show License
